CAREER OBJECTIVE

To contribute my technical skills to a dynamic and innovative IT organization, seeking opportunities to develop expertise in software development, system services, and data analysis while delivering positive outcomes through strong problem-solving and communication abilities.

TECHNICAL SKILLS

Programming Language:

- **Python** (Basics, OOP, File Handling, Pandas, NumPy, Seaborn, Matplotlib)
- **Java** (Beginner) (Syntax, Basic Programs)

Data Analysis:

- **Pandas:** Cleaning Data, Data Manipulation, Handling Missing Data, And Performing Exploratory Data Analysis (EDA)
- **NumPy:** Array Operations, Mathematical Computations
- **Seaborn & Matplotlib:** Data Visualization (Bar, Line, Scatter, Heatmaps, Distribution Plots)
- **Microsoft Excel:** Data Cleaning, VLOOKUP, HLOOKUP, Pivot Tables and Data Visualization
- **Power BI:** Importing Data, Power Query Cleaning, Building Interactive Dashboards, DAX Formulas

Databases:

- **SQL:** CRUD Operations, Joins, Sub-queries, Grouping & Aggregates, Views.
- Experience with Oracle SQL, SQLite, and basic understanding of relational database design

Web Development:

- **HTML, CSS, JavaScript**
- **Django:** Basics, Template Rendering, Forms & Validation, User Authentication, Admin Customization, Database Integration, Static/Media File Handling, Creating Custom Django Apps

VERSION CONTROL AND TOOLS

Git & GitHub:

- Git basics: clone, commit, push, pull, branch.
- Experience managing project versions and hosting code repositories.
- Familiar with collaborative workflows using GitHub.

Tools:

- Visual Studio Code
- Pycharm
- Jupyter Notebook
- MS Office
- Anaconda
- Spyder,
- IntelliJ IDEA

EDUCATION

- **B.Tech Information Technology** at **K.S.R. College of Engineering** at Tiruchengode with current **CGPA 7.44 (2025)**.
- **HSC** at **Bharathi Balamandir Matric Higher Secondary School**, Chinnasalem with 69.9% (2021).
- **SSLC** at **Sakthi Matric Higher Secondary School**, Kaniyamoor with **57.4%(2019)**.

INTERNAHIP

Python Programming Intern — System Tron

 Jan 2024  Online Mode

- Completed a one-month online internship focused on Python programming fundamentals.
- Practiced hands-on coding using Python in Jupyter Notebook and Pycharm.
- Built small programs demonstrating loops, functions, file handling, and problem-solving.
- Strengthened logic-building skills through real-time coding practice.

PROJECTS

An Efficient Deep Learning-Based Firearm Detection System Using YOLOv8

Description: This work emphasizes the importance of firearm detection in maintaining public safety, especially in high-risk environments such as schools, airports, and public gatherings. The study compares two object detection models YOLOv4 and the proposed YOLOv8 for their effectiveness in firearm recognition. ([link](#))

Personal Portfolio Website

Description: A responsive personal portfolio website developed using HTML, CSS, and JavaScript to showcase skills, projects, and achievements. Designed with a clean layout for improved recruiter visibility and deployed on Vercel for fast and reliable hosting. ([link](#))

ACHIEVEMENTS

Here is a list of completed courses and achievements:

- It was awarded second prize in the "International Science Exhibition" at RD International School".
- I completed Infosys and Springboard's "Introduction to Python" courses.
- I Completed a "3-day HTML & CSS Essentials Bootcamp" by Let's Upgrade.
- I participated in an International Student Workshop on "Data Science using Python".
